

« **Electronics Industry** »

Sector Strategic Committee

The creation of the Strategic Committee marks the acknowledgement of the strategic role **of the Electronics Industry Sector and the stakes associated**

Official launch of the Strategic Committee on March 15th, 2019
starring Bruno LE MAIRE, French Minister for the Economy and Finances.

President

Thierry TINGAUD

Vice-president

Vincent BEDOUIN

Key Numbers

15 billion €

of revenue comprising

4 billion € in which **80% is dedicated to exportation**

in Microelectronics

3 billion €

Connectivity and Printed Circuit Boards

5 billion €

Electronics assembly

3 billion €

Others (In which 1.3B€ to Embedded software, 1B€ for equipment and 0.7M€ for distribution)

200 000 employments

(direct employment)

150 000 employments

(indirect employment)

76 000 entreprises

specialized in Embedded software

8 000 researchers

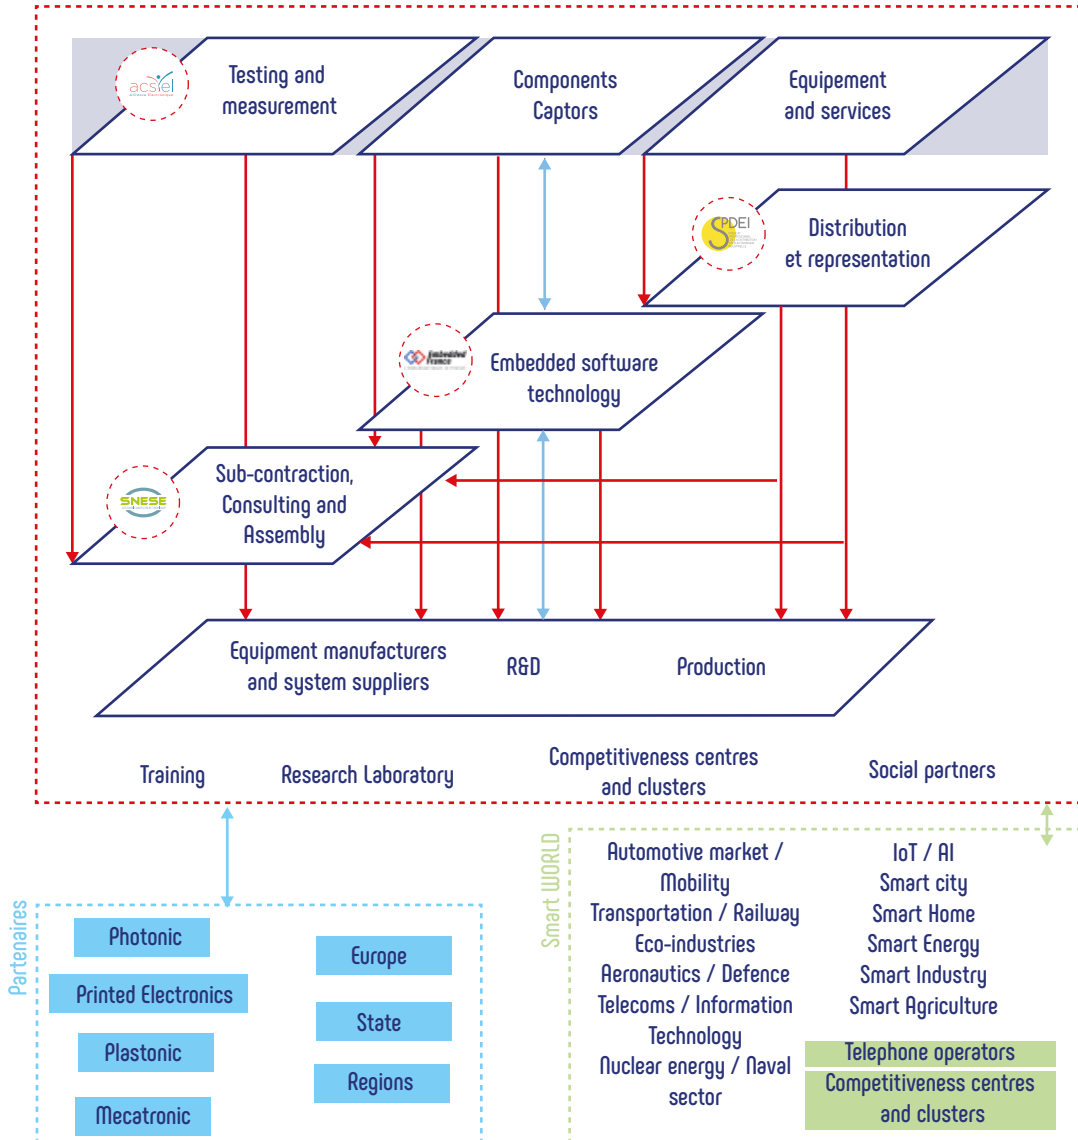

in public research organisms

6 key priorities of the SSC

- 1 — Boost mastery of key technologies** of the semiconductor and the embedded software technology by launching major R&D programmes ;
- 2 — Boost the transformation of the sector** towards 4.0 within an already highly automated and robotised industry ;
- 3 — Spreading electronics** as part of the digital business transformation
- 4 — Adapt skills and jobs** to the needs of the industry
- 5 — Take part in a reindustrialisation movement** for the European electronic sector, and act collectively to face the big companies worldwide ;
- 6 — Promote application sectors** with tailored AI solutions.

«Electronics Industry» Sector

Innovation incentive from hardware to practical uses

A pivotal sector for energy and digital transitions

Spanning all industrial activities and vital for the success of the digital revolution and French energy transition, **the electronics industry is the true industrial foundation of an increasingly intelligent and connected world.**

It is at the heart of French industrial dynamic and represents an important driver of industrial competitiveness. **It is also one of the keystones of national strategic and economic sovereignty, ensuring our technological independence**

Role and missions of the Sector Strategy Committee

The mission of the 'Electronics Industry' SSC is to **identify links between the sector's key challenges and reciprocal commitments by the State, regions and manufacturers**, to put forward proposals for practical actions and to monitor their implementation.

The aim of the SSC's six 'Electronics industries' drivers, endorsed by the National Industry Council (CNI) and formalised in the sector's strategic contract, is to enhance performance of the electronics industry and, given its pervasive nature, to drive **all of French industry towards modernisation.**
